

Roll no: 18

Practical 6 - OwnCloud:

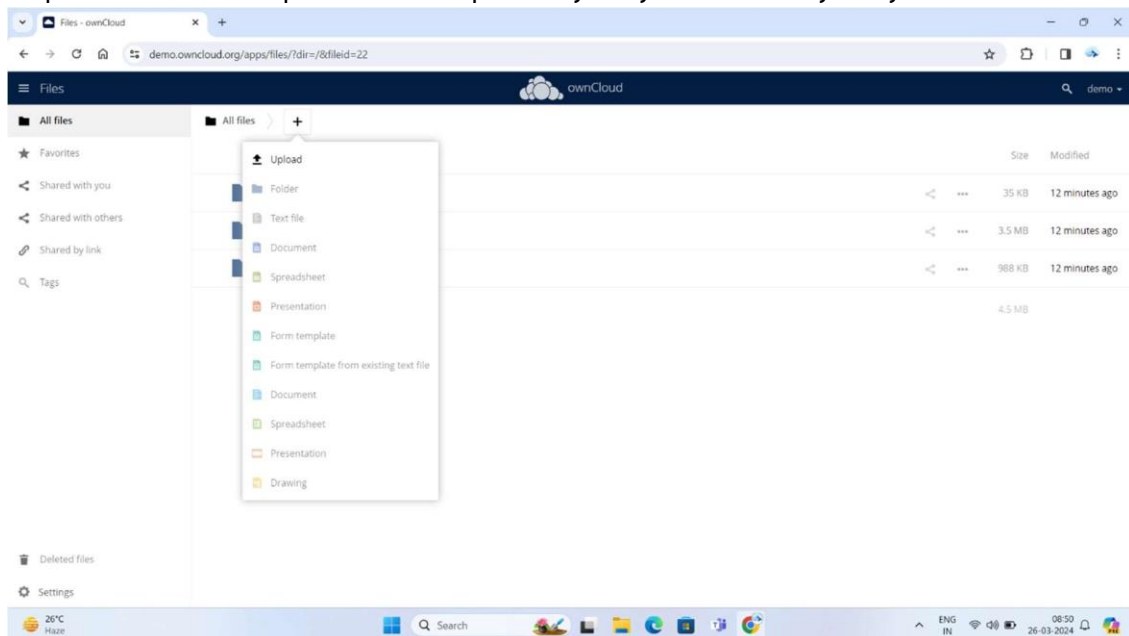

Aim: To upload file on OwnCloud and share it across internet.

Steps:

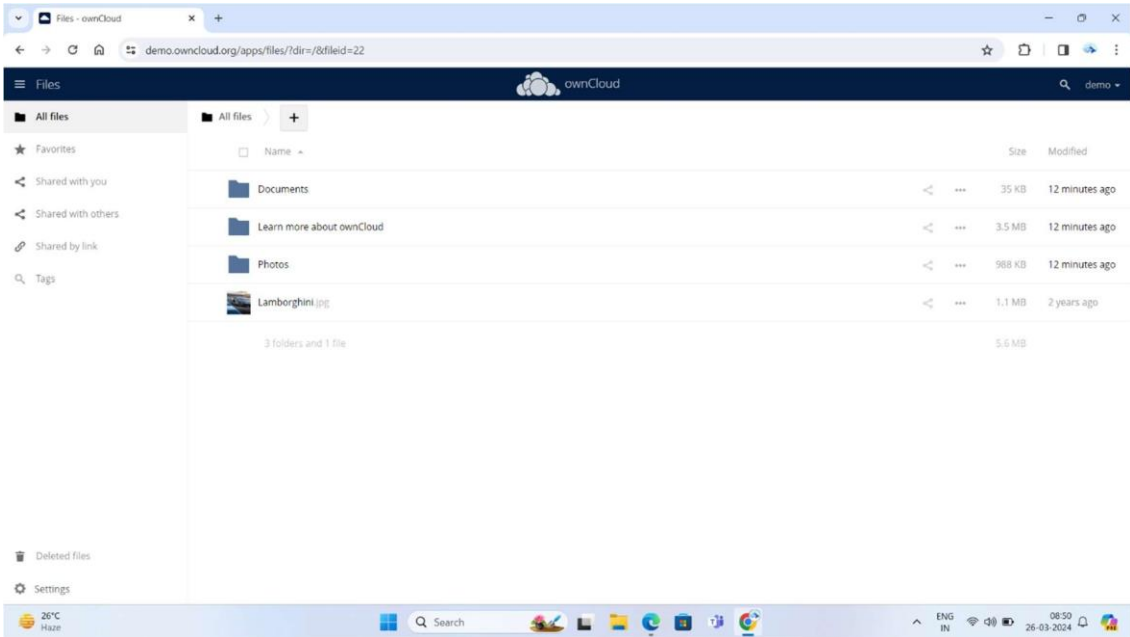

Step 1: Go to Google Chrome, search “OwnCloud demo”. Then open the website, fill up the username and password as “demo”.

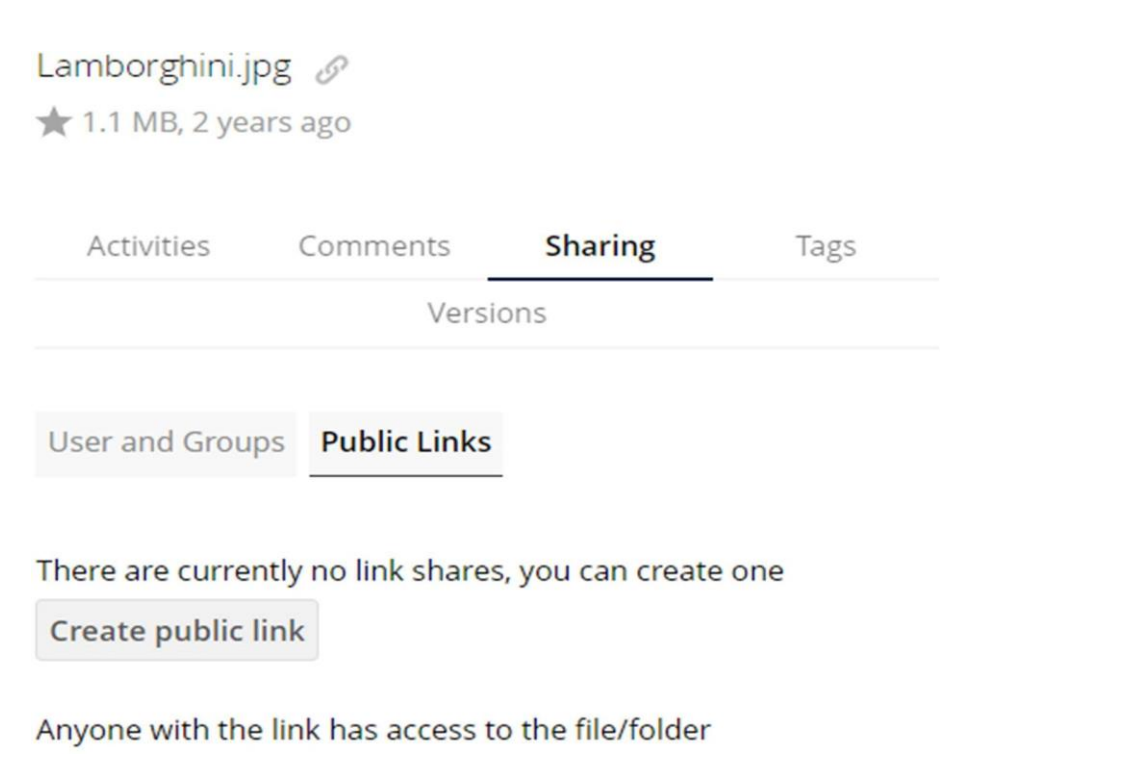

Step 2: Click on “+” > Upload File and upload any file you want from your system.

Step 3: It will take few seconds to upload the file. Once uploaded, you will see it as added at bottom.

Step 4: Click on the file. A menu will open on right hand side of the web page. Go to Sharing window.

Step 5: Click on Create public link. A window will open, give the name of your link.

×

Create link share: /Lamborghini.jpg

Link name

☒ Download / View

Recipients can view or download contents.

☐ Download / View / Edit

Recipients can view, download and edit contents.

Password

Expiration

Step 6: Now a link will be created at right hand side menu. You can now share it across internet via email or any other social media platform.
